Scrum

Responsive Design

Unit Testing

SOLID Principles

OOP

EDUCATION

Certificate of Specialization
in website Development

College of the Canyons
Valencia, CA

PROFILE

I build front end applications using modern technologies and develop video games using the Unity engine in my spare time. I am looking for a team that will challenge me to become a better skilled front-end engineer.

EXPERIENCE

Front-end Developer

10/2014 - Present

Destini LLC. - Sherman Oaks, CA

- Utilize HTML5, CSS3/SASS, CSS Flexbox, CSS Grid and JavaScript to create over 160 mobile friendly product locators
- Add additional functionality to product locator engine including product filter dropdown, email dropdown, and other JavaScript functionality
- Contribute to Scrum meetings by providing solutions to any issues pertaining to the Destini system
- Test cross browser functionality and fix both desktop and mobile layout bugs
- Refactor, design and develop company's core website using modern technologies, clean code, and web best practices
- Mentor new hires on the Destini Locators engine including the template structure and the team's best practices
- Create, manage, and update client's products and store databases using the Sequel Pro management application
- Collaborate with dev team to plan ways on decreasing locator development time
- Promote and communicate new ideas, process improvements, and new technologies to key stakeholders such as working with other developers to improve the main stylesheet to use CSS3 best practices like naming conventions and consolidation

Front-end Developer, Intern

11/2013 - 10/2014

The Latest - Santa Monica, CA

- Collaborated with designers and back-end engineers to develop the front-end for informational news website
